ELECTRIC READY-TO-FLY 2-IN-1 VEHICLE

## VERTICAR

Electric Ready-To-Fly  
2-In-1 Vehicle

### SPECIFICATIONS

Length: .....4.5"  
Rotor Diameter: .....5.5"  
Weight: .....0.9 oz  
Battery: ..... Lithium Polymer  
Flight Duration: .....10 minutes  
Charge Time: .....15-30 Minutes  
Functions: ..... Throttle,  
.....Yaw/Turning, Pitch

### PACKAGE SPECS

Age: ..... 8 to Adult  
UPC: ..... 665766096157 (Yellow)  
..... 665766096164 (Red)  
Case Pk: ..... 6  
Country of Origin: .....China

### REQUIREMENTS

- 6 "AA" Alkaline Batteries

### SET INCLUDES

- Verticar Helicopter
- Transmitter w/ integrated charger
- Spare Rotor Blades
- Manual

Megatech's new Verticar is a unique 2-in-1 vehicle. It can drive like a car, then with the flip of a switch, take off and fly like a helicopter! The Verticar comes 100% complete and ready-to-fly.

The Verticar's counter-rotating blade design enhances its stable flight design making it easy to fly, even for first time flyers.

Charging the on-board Lithium Polymer battery pack is a snap, because the charging cable is built into the transmitter. The Verticar is able to synchronize on one of three different channels, selected by the transmitter; This allows you to have some flying fun with two friends at the same time! The Verticar also has flashing LEDs which allows you to navigate in low-light conditions.

Available in 2 colors - either yellow or red.

MTC 9615 - YELLOW

**NEW!**

**AVION**

**NOW INCLUDES  
2.4GHZ ACCU-TRAK™  
RADIO SYSTEM**

AVION-io 2.4GHz delivers easy and exciting R/C flight performance indoors as well as outdoors.

The AVION-io 2.4GHz is packed with features:

- 2 Channel 2.4GHz Fully Proportional R/C system with adjustable trim for solid control at all times.
- Advanced micro technology.
- Can take off from the ground in as little as 10 feet.
- Floats like a feather with gentle enough flight characteristics to land in your hand.
- Lightweight high lift Bi-plane design.
- Can soar into the skies for up to 20 minutes on a single charge.
- Adjustable tail can be set for beginners and experts alike.
- Recharges directly from the built in peak detection fast charger in the transmitter.
- Removable extended run time Lithium Polymer battery.
- Up to 6 channels to choose from which allows flying with friends

## 3-CHANNEL ELECTRIC READY-TO-FLY AIRPLANE

**NEW!**

**B3**

Megatech's B3 is 100% built and ready-to-fly. The B3's under-cambered reflex airfoil assures that this plane is very easy to fly. The extremely rugged EPP (Expanded Polypropylene) construction makes the B3 an excellent choice for first-time pilots. The upgraded Accu-Trak™ 2.4GHz radio system is synchronized with your specific plane to ensure a rock-solid radio signal at all times. The B3 looks extremely cool—and definitely flies great!

The B3 also includes a landing gear for smooth landings and the ability to take off from the ground!

#### Features

- Takes off from the ground!
- Constructed of super resilient EPP foam
- High-lift under-cambered wing
- High performance motor for added thrust and smooth performance
- Charges directly from the transmitter for convenient at-the-field recharging.
- High performance LiPo battery pack

**NOW INCLUDES  
2.4GHZ ACCU-TRAK™  
RADIO SYSTEM**

# HOUSEFLY

Unlimited 2.4 GHz

## NEW!

You have been waiting for it, and now the wait is over! You can own the ultimate in radio controlled helicopters, The HouseFly Unlimited! This helicopter has the Megatech dual rotor/fly bar technology which enables the novice pilot to have successful flights even while learning. The 4 channel radio system with LCD throttle display screen is included, so there is nothing else to buy. Amateur and Pro alike will benefit from the Megatech exclusive 2.4 GHz Accu-Trak™ radio signal technology. The HouseFly Unlimited is always under your control. When it is time to charge the Lithium-Polymer battery, it can be charged directly from the transmitter. Buy it today, and enjoy it for years to come!

### FEATURES:

- Dual rotor and flybar flight stability
- 100% ready-to-fly
- Rechargeable Lithium Polymer battery
- 4-Channel Accu-Trak™ 2.4GHz Digital Proportional Radio with LCD screen and integrated charger
- Transmitter is Mode 1/Mode 2 switchable

### REQUIREMENTS

- 6 "AA" Alkaline Batteries

### SET INCLUDES

- Sky Trooper Helicopter
- LiPo Battery (Built-In)
- Transmitter w/ Charger
- Antenna
- Spare Tail Rotor
- Manual

Megatech's SkyTrooper applies the latest RC technology to a helicopter that is both easy to fly and highly maneuverable. The light-weight, high-power Lithium Polymer battery pack provides extra long runtimes and allows the SkyTrooper to climb effortlessly into the sky. When flying indoors, precise turning ability is essential, and can be achieved using the two-stick transmitter with accurate trim control. With its super-bright LED searchlight and flashing navigational lights, flying in the dark is no longer an obstacle. The SkyTrooper helicopter will keep flying even at night!

### Features:

- High capacity LiPo battery power for increased runtime and performance
- Bright white LED searchlight and two flashing red & blue navigational lights
- Two-stick transmitter with built-in LiPo peak charger
- Capable of up, down, left, right, and forward movement
- Counter-rotating main blades with stabilizing fly-bar
- 100% ready-to-fly

**LOOPS & ROLLS**

**FLASHING  
HIGH INTENSITY  
LED LIGHTS!**

**GREAT FOR FLYING  
DAY OR NIGHT!**

Megatech's Interceptor is much more than just an awesome looking jet. It's a 10-inch wingspan R/C model featuring excellent flight performance, flight-duration, and overall durability. In other words, it has got all the right stuff! Interceptor's MicroMag™ twin motors supply so much thrust that it will do a complete loop—no problem! With the twin-stick transmitter you have complete control over climbing, diving, and left/right turning. The Interceptor employs differential-thrust turning (independently varying the RPMs on each of its two motors), the best way to insure a smooth turn every time, making you look like a pro-pilot! The Interceptor utilizes only the best and latest Lithium Polymer rechargeable battery technology for power and long flights. The two-stick transmitter also has built-in charging circuitry for convenient charge it anywhere—any time capability.

**Features:**

- Capable of vertical climbing and looping
- Twin-motor thrust-differential turning technology
- Counter-rotating props for straight tracking
- 100% ready-to-fly right out of the box
- On-board rechargeable Lithium Polymer battery
- Two-stick transmitter incorporates "charge-it-anywhere-any time" technology
- Constructed of flexible and super rugged EPP (Expanded Polypropylene)
- Can be flown indoors & outdoors!

#### SET INCLUDES

- Police Airplane
- LiPo Flight Pack (Built In)
- Transmitter / Charger
- Manual

#### REQUIREMENTS

- 6 AA Alkaline Batteries

The Real World Series Police airplane is a great plane for outdoor enjoyment. This airplane features a strong foam body that enables it to withstand gentle crashes. The easy-to-use controller features both left and right levers. The levers have the ability to control throttle and turning. This 2-channel radio controlled airplane charges via the transmitter and comes pre-assembled. It is ready to fly as soon as you take it out of the box. That is when the fun begins with the Megatech Real World Series airplane!

#### Features:

- Great for outdoor fun
- Left and right levers control throttle and turning
- Includes plane, transmitter, antenna & one LiPo battery (Built In)

ALSO AVAILABLE  
MTC 9610 - SKYLINER

**NEW!****Freedom Flyer**

**NOW INCLUDES  
2.4GHZ ACCU-TRAK™  
RADIO SYSTEM**

Freedom Flyer simply has all the right stuff required for a fantastic beginner to intermediate radio-controlled model. The combination of the high-lift wing and powerful motor, energized by an 8.4V NiMH battery pack, get this sharp looking little airplane to altitude fast!

The Freedom Flyer does things that other small electric models cannot! Takeoff and landing from pavement or other smooth surfaces is no problem because of its power and high temper spring landing gear.

We've even given the Freedom Flyer a 2.4GHz Radio system that synchronizes with your specific plane for superior signal quality, so it has all the ingredients for success the first time out. When you are ready for advanced maneuvers, the Freedom Flyer performs loops, rolls and other stunts, thanks to its proportional throttle, rudder, and elevator.

Experienced pilots can do stunts and loops

Takes off from the ground like a real airplane!

Durable construction

- Transmitter / Charger
- Manual

**REQUIREMENTS**

- 6 AA Alkaline Batteries

The outdoor police plane and indoor/outdoor fire department helicopter are 2 radio controlled aircraft in one box! Twice the indoor/outdoor fun at one very low price. Both units feature throttle, and left/right control. Each has a built-in battery pack, and can be charged from the included transmitter. The police plane has a range of 300 ft. The fire department helicopter has high intensity LED's for night missions and a range of 150 ft. These two very special aircraft will be a sure hit with the "pilot" in your family.

**Features:**

- Durable EPP Foam for Crash Resistance
- Helicopter has Right, Left, Up Down and natural forward movement
- Both units charge from the included transmitter
- Transmitter has frequency changing A/B switch to control both aircraft.

## 2-CHANNEL REMOTE CONTROL MICRO BIPLANE

# AVION

AVION-i delivers easy and exciting R/C flight performance.

The AVION-i is packed with features:

- 2 Channel Fully Proportional R/C system with adjustable trim.
- Advanced Micro and Spectra-link Optic-Control™ Technology.
- Can take off without hesitation.
- Lightweight high lift Bi-plane design.
- Floats like a feather with gentle enough flight characteristics to land in your hand.
- Up to 15 minutes or more of flight time on a single charge.
- Recharges directly from the built in peak detection fast charger in the transmitter.
- Optional landing gear and carrying case available.

## FREE FLIGHT AIRPLANE 2-PACK

Learn the basics of Aerodynamics with the Megatech Real World Flight Series. This item is specifically designed for children showing interest in aviation. The basics of aerodynamic flight can be quickly understood and applied. The Free Flights are the perfect way to introduce a child not only to the wonderful world of model aviation, but also to the laws of aerodynamics. These rules apply equally to both models and full sized aircraft. The unit will take 20 seconds to charge its internal capacitor from the included charger. Turn it on, toss it into the air and let the fun begin! Enjoy the realm of flight with the Megatech Free Flight 2 pack.

sail winch servo.

**FASTEST  
READY-TO-SAIL  
BOAT IN ITS  
CLASS**

**NOW INCLUDES  
2.4GHZ ACCU-TRAK™  
RADIO SYSTEM**

**N**irvana II is a ready-to-sail, RC competition sailboat that has been designed to handle like a full-scale racing yacht. It features a low-drag hull design, removable racing keel, and large deep-water rudder for precision control. All of the rigging is mounted to a carbon fiber mast. The fully proportional sail winch allows the sails to be trimmed for any combination of wind conditions and heading. The package also includes a 2.4GHz radio system for the perfect signal everytime.

- 95% ready-to-sail
- Low-drag composite hull design
- All rigging is pre-mounted on the carbon fiber main mast
- Ballast bulb style racing keel features a quick release for easy portability
- Large deep-water rudder
- Fully proportional radio with sail winch control
- Only minutes from box to water (no glue required)
- Durable design
- Capable of sailing in up to 20 knot winds!
- Jib features lightweight boom and adjustable clew tension

Mast features quick release for portability. Both jib and main sail booms are trimmed via the proportional radio control system

Radio compartment is double-sealed for water tightness.

Fully installed digital/ proportional radio provides accurate sail control and trim adjustments.
